

MATERIAL CHARACTERIZATION SERVICES

MOLDFLOW® MATERIAL CHARACTERIZATION

We offer Moldflow®'s highest level GOLD certification material characterization tests, including specialized proprietary Autodesk® methods and more conventional techniques.

TEST SPECIMEN MOLDING

Beaumont has developed a high precision molding cell dedicated to producing plastic test specimens to the industry's highest standards. All standard ISO/ASTM offerings available, and custom orders.

THERMA-FLO™ MATERIAL TESTING

The first comprehensive, direct measurement method and software analysis for mapping the actual characteristics of a polymer melt in an injection mold. Easy to interpret graphical data.
